

DROP

Salt Sensor

Never Run Out of Salt Again

As powerful as it is simple, the DROP Salt Sensor lets you know when to add salt to your DROP Water Softener before you run out, ensuring you always have soft water. The Salt Sensor comes standard with all DROP Softeners.

Features

- Notifies you via push notification, text message or email when it is time to add salt
- Comes standard on all DROP Softeners
- Can be added to any softener with a 3.5" or 4" brine well
- Proprietary paddle designs provides the most accurate level indication on the market
- 7" Paddle extender available
- 1 Year Warranty

Benefits

Hard water is the result of a combination of dissolved calcium and magnesium. These minerals cause soap scum and water spots on water fixtures, and can greatly shorten the lifespan of common appliances. Hard water frequently necessitates 20-30% more energy to heat water, and 3-4 times more soap and detergent for cleaning and laundry. With the DROP Salt Sensor, you can ensure you always have salt in your softeners, eliminating the problems of hard water.

The DROP Salt Sensor comes standard with all DROP Softeners.

The DROP Hub

The Salt Sensor requires the function of the DROP Hub. The Hub is the connection to everything on the DROP Smart Water Management System. It integrates all of your DROP residential water devices together.
